

FAASTeam presents:

Safely Flying to Catalina Island

Join Bakersfield Flying Club CFIs Courtney Risner and Anthony Johnson for a seminar on planning and executing a safe flight to Catalina Island. The airport presents unique challenges to first time pilots approaching, landing and departing from the Island's 3000' X 75' mountain top airstrip with its topographical layout, visual restrictions and challenging winds. Review basic over water flight procedures and what resources are available to a pilot in the event of a ditching.

Review mishaps that have occurred over the years at Catalina and the lessons learned from mistakes made by pilots flying to "The Airport in the Sky".

Directions: Bakersfield Flying Club is located on the second floor of the Bakersfield Jet Center, 1601 Skyway Drive, Suite 220, Bakersfield, CA 93308. Go up the stairs to the main entrance of the Club. The meeting room is through the first door on the right.
